

3D Animation/Video

Making the Scene

Name- _____

Up to this point you have been learning how to make models, add bones, create actions, and make the model move. You have been creating your character and making the necessary actions, bones and other parts as you go. Now you should be ready to make your final scenes for your animation. For this assignment you will need to create a 10 second animation per each person that is in your group. So if you have 1 person in you group you only need to have 10 seconds of animation. If you have 2 people then 20 seconds. For each second that you lack you will lose 2 points for the score.

Items in LRF	Score
Rendered animation movie of at least one 10 second per person scene (30 points)	
For each second less than 10 seconds -2 points.	--
Total pts.
